MEMORANDUM FOR: Deputy Director (Intelligence)

**SUBJECT : Proposed OCI Utilization of Middle East
Photography**

1. In order to permit maximum utilization of significant photo-intelligence pertaining to the Middle East, the Assistant Director, Current Intelligence, through his TALENT Control Office, proposes to do the following:

(a) Passing the PI results, chiefly aircraft and ship counts, classified TOP SECRET, and without source attribution, to selected OCI analysts, not all of whom will be TALENT cleared.

(b) Using the PI results in maps and graphs in all-source OCI publications or for briefings of the NSC and White House, such maps and aids to be classified TOP SECRET.

(c) Issuing PI results in all-source OCI publications as background or comment without source attribution. Publications will be reviewed to insure against compromise of the source, and will not be classified below TOP SECRET.

(d) Using the PI results, without source attribution, in CIA Support for the NIC and the IAC Watch Committee.

2. In those cases in which mention must be made of the source for fullest explanation of the material, it will be included only in OCI Intelligence memoranda to be kept within the TALENT Control System.
